- Firebase
- Retrofit
- Object-Oriented Programming
- Android Studio

## Soft Skill

---

- Decision making
- Time Management
- Communication
- Teamwork

## Education Background

---

- B.TECH(Information Technology)  
ABES Engineering College 2025  
Avg. CGPA: 8.18
- Senior Secondary (12 Th )  
M.G.Public School - 2021  
CBSE ( 94 % )
- Secondary (10 Th )  
M.G.Public School - 2019  
CBSE ( 88.2 % )

## About Me

---

As a fresher in the field of Android development, I bring a strong foundation in both Android app development and database management. Proficient in Java and Kotlin, I am eager to apply my skills to create innovative and user-friendly mobile applications. With a keen interest in Data Structures and Algorithms (DSA).

## PROJECTS

---

- Expense tracking project is used to efficiently manage finances, focusing on database management for seamless data organization and retrieval. Dedicated to crafting a user-friendly interface and robust functionality to simplify expense management and enhance financial awareness.
- Developed a robust TODO application in Kotlin utilizing Room database for efficient local storage, featuring a clean MVVM architecture and a user friendly interface.
- Developed chatting app built using the MVVM architecture and Firebase, ensuring robust user authentication and seamless messaging experience.

## Achievements

---

- Problem Solving Hackerrank (Basic and Intermediate)
- SQL Hackerrank (Basic and Intermediate)
- Java Hackerrank (Basic and Intermediate)
